

## 2004 Quadrennial Congress of Sigma Pi Sigma

### One & One Campaign

#### Fundraising ideas from the National Congress Planning Committee:

1. Approach the student government/senate for funds. Emphasize that it is a national meeting of physics students and professionals with top-notch speakers (list them). Mention the Trinity Site trip; a big draw for the physics community, students and professionals alike.
  - It is also helpful to build in a contribution by the student and the department with the proposal--say \$100 each or so.
2. Buy textbooks for a discount and sell them to students.
3. Sell *t-shirts*, or *physic-y toys* or *food* around campus, at a state science fair, or at other events.
4. Sell lab manuals.
5. Tutoring—especially, right before the exams in the freshman physics classes.
6. Used book sale or silent auction.
7. Garage sale of personal and department junk. Old scientific apparatus makes fine curiosities.
8. Sell donuts and coffee in the physics building lobby on a regular basis.
9. Have a car wash in winter, especially where they salt the roads. (Note that many Wal-Marts will match what you make so only a few cars gets a big profit.)
10. SPS lawn crew – cut grass and do yard work in surrounding neighborhood as a group; the work goes quickly and it becomes a social activity.
11. Sell pizza slices or cookies in dorms at exam time around mid-night.
